Company Overview

Industrial Electrics Pty Ltd is a leading electrical and communications installation contractor, providing a diverse range of electrical services.

Key Services:

- Commercial
- Industrial
- Communications

Our strong ' best practice' methods and proven record of success ensure our high quality; safe and cost-effective services are delivered in a timely manner. Industrial Electrics continues to be seen as industry leader in both business and government based electrical solutions for South East Queensland and Northern NSW.

Our team operates within a regularly audited Integrated Management System to ensure a consistent level of quality is achieved. By following this system, Industrial Electrics continues to deliver electrical and communications services at an outstanding level of quality, reliability and value.

We regularly conduct internal and external auditing of our Quality Assured ISO:9001 and Safety AS/NZS:4801 certified systems.

Capabilities

Industrial Electrics is a well-established industry leader in the design, installation, and maintenance of electric, communications and energy saving systems.

The company primarily services QLD and Northern NSW with the following services:

- Hazardous Area Installation & Maintenance
- Confined Spaces
- Profibus Installation
- Substation Awareness
- Instrumentation
- C-Bus Installation & Programming
- NBN Contractor Certification
- Infrared Thermographic Scanning and Optical Fibre

People

Industrial Electrics recognise employees as the company's most valuable assets and therefore has a commitment to providing ongoing training, development and support them.

Industrial Electrics retains quality employees by providing in-house and external training and development programs. Employees are continually improving their skills in their respective fields of expertise.

The training and development of employees has allowed the company to provide opportunities and promotion from within Industrial Electrics. Keeping our employees satisfied with the level of training they receive ensures that the company maintains high performing, cohesive and loyal employees.

Directors and Senior Staff

CRAIG COPELAND

Director

craig@industrialelectrics.com.au
0411 222 006

Qualifications

} Leading Businessman & Entrepreneur
}Licensed Electrician

After finishing his apprenticeship Craig left his hometown in New Zealand and headed for England to further his career as a mobile technician, maintenance supervisor and building services manager for various companies.

After gaining experience in England, Craig returned to New Zealand to move into the construction industry. Some time later Craig found himself working for United Group in gold mines, gas fields and switch yards throughout Australia.

Craig now enjoys his role as a Director at Industrial Electrics Pty Ltd, working with Vaughan to build a company known for outstanding quality and great working relationships with customers.

Management Systems

WORKPLACE HEALTH & SAFETY MANAGEMENT

Industrial Electrics have a proactive policy, which ensures all employees are provided with a safe and healthy work environment. Our management staff are dedicated to accident prevention, hazard control and removal, injury protection, heath preservation and promotion.

Our high level of safety is achieved by:

- Planning, developing, implementing and monitoring comprehensive Health, Safety and Welfare Programs.
- Promoting the understanding of Health, Safety and Welfare as a normal component of all aspects of work.
- Providing a healthy and safe workplace.
- Encouraging employees to report accidents promptly, unsafe practices or conditions that become apparent and work with others to promote a safe workplace.

All employees and sub-contractors are fully aware of the system and kept updated on their ongoing responsibilities through company and project inductions, toolbox meetings and safe work methods.

Safety audits and inspections are conducted at the Industrial Electrics workplace and job sites to ensure ongoing compliance to company standards and continuous improvement.

ENVIRONMENTAL MANAGEMENT

Industrial Electrics is committed to minimising the impact of any environmental risks and / or spill incidents occurring in the workplace. We have systems in place to ensure staff, facilities, equipment, stock, neighbours and the environment are protected at all times.

QUALITY ASSURANCE & MANAGEMENT

Industrial Electrics is committed to providing our clients with exceptional quality of products and services in a creative and innovative manner.

To ensure all our work is achieved in a legal and efficient manner, we have established a quality assurance program. The program provides our clients with an assurance the quality on the products and services provided will meet current and future customer requirements.

We constantly review our operations with our key stakeholders and continuously monitor all levels and inputs into our organisation to achieve improvements wherever possible.

Above all, we deal openly with our clients, staff and suppliers to make sure we begin and maintain honest, open and positive relationships. We recognise these relationships are dynamic and need constant care and management.

This program includes a Quality Manual based upon AS NZS ISO 9001:2008 and other standards to meet our stakeholder's needs and expectations.

Within Industrial Electrics the definition of standards complies with AS/NZS AS NZS ISO 9001:2008. Specifically, the implementation of this policy refers to the achievement of the above and following objectives:

- To ensure the highest quality of service.
- Make everyone in the organization aware of their responsibilities in maintaining and improving the quality of our products and service.
- Commitment to the achievement of higher standards of customer satisfaction, consistent with professional standards and ethics as defined by the professional bodies associated with the Quality Assurance Industry.
- To achieve and maintain a reputation of image and quality.
- To adopt an approach in the pursuit of all quality objectives.

Culture

Industrial Electrics Pty Ltd is a locally owned family orientated business, based in Burleigh Heads on the Gold Coast.

Industrial Electrics have strong equal opportunity values, with apprentices and qualified tradesmen from various cultural backgrounds. We value each other's diverse balance of experience and knowledge, working together in a non-discriminatory environment.

Wherever possible, Industrial Electrics employ local team members to ensure local knowledge is readily available and sustained within the company. Students from local schools and trade colleges are encouraged to participate in work experience with the company, allowing them to confirm their compatibility for a career in the electrical industry. Work experience often leads to an apprenticeship with the company and the start of a varied and interesting career.

Client Services

Industrial Electrics ensure our customers are supported though our specialist services covering preventative, routine and breakdown maintenance and energy management.

commercial

industrial electrics

Industrial Electrics is extremely experienced in providing high quality electrical services in all facets of electrical installations and maintenance.

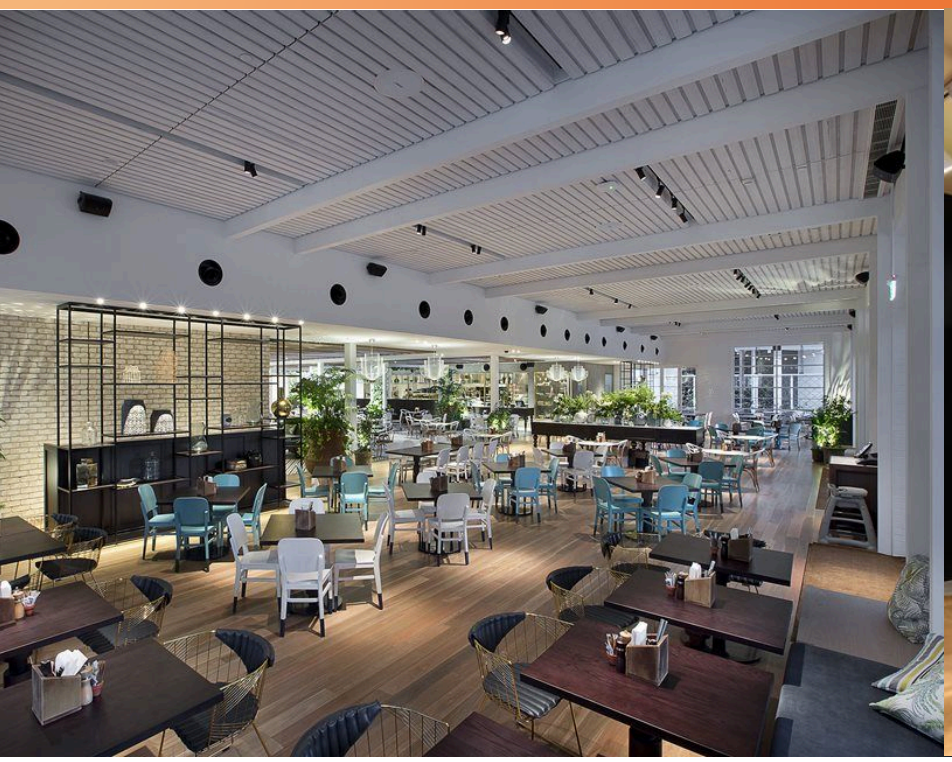
resources

industrial electrics

Industrial Electrics has the experience and financial capability to contract to enterprise organisations and Government projects. Our planning and delivery processes start with an initial consultation involving clients and suppliers to ensure all deliverables will be met. The next stage of project is implementation through engineering, design, commissioning and ongoing maintenance.

We have the staff and supply chain capacity to deliver electrical communications infrastructure projects of all sizes in both private and public sectors.



The Garden Bar Jupiter's Casino

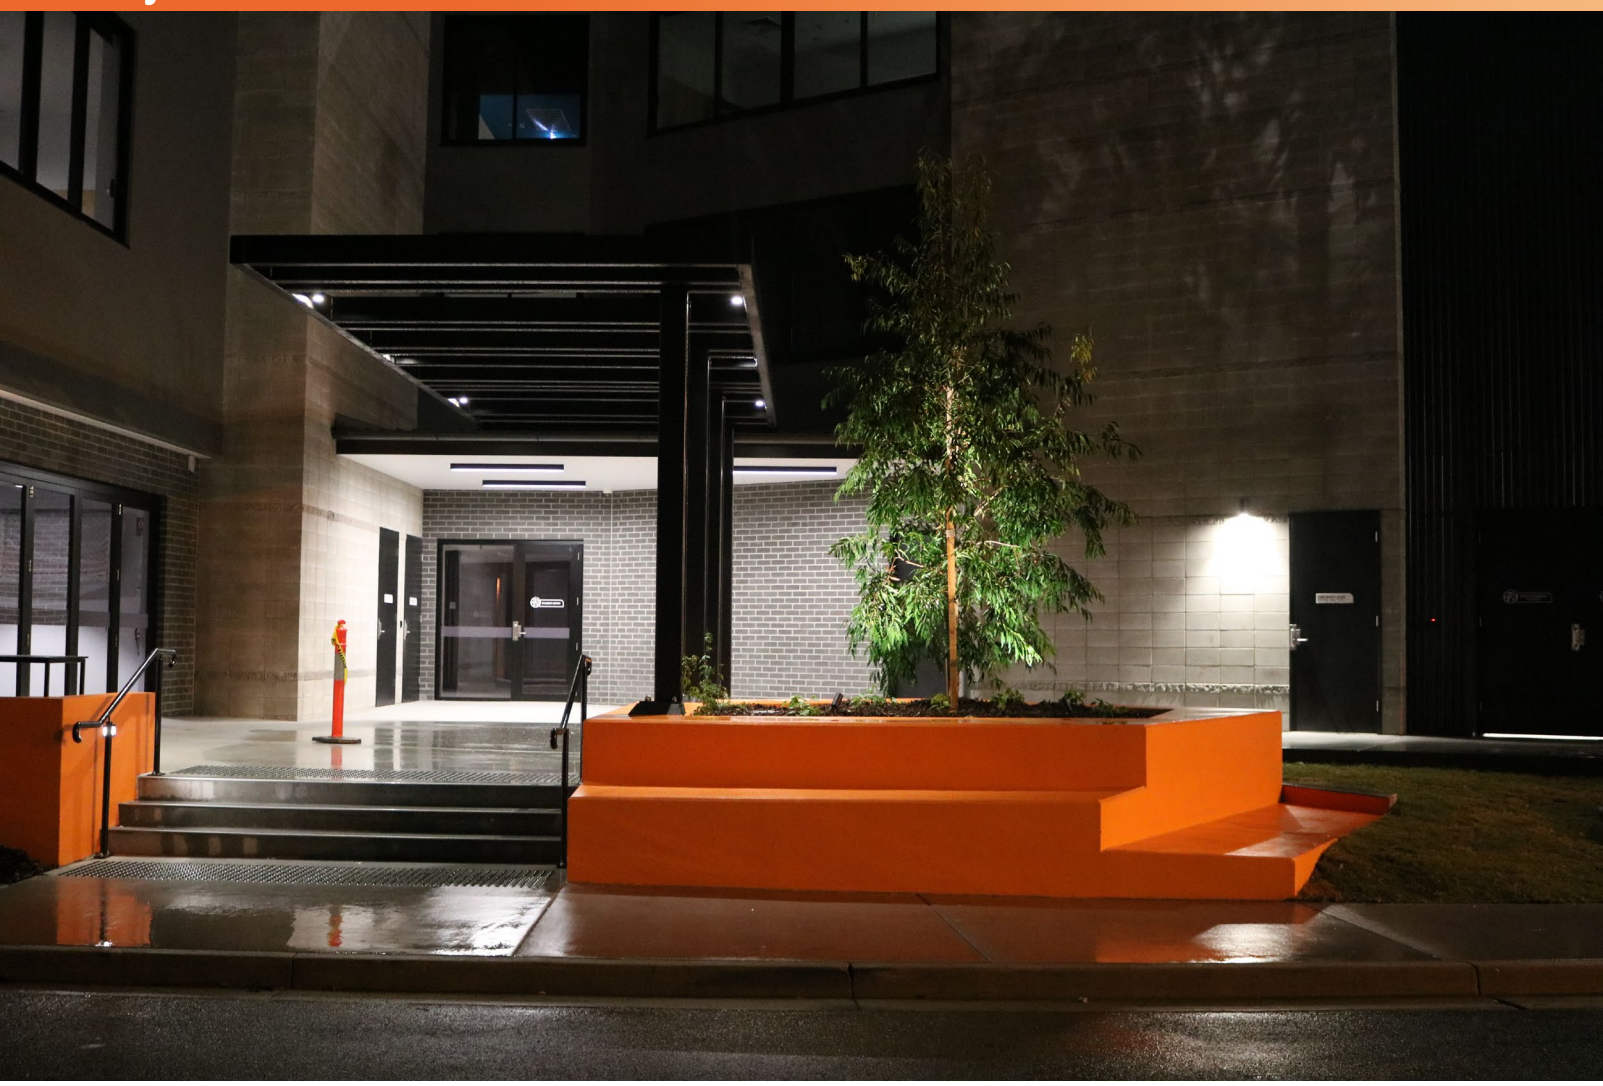
1, Casino Level
The Star Gold Coast
Casino Dr, Broadbeach
QLD 4218

Industrial Electrics have had the privilege of working alongside The Star Group since the opening of the Garden Bar in early 2020. The Garden Bar project was a five-month duration and totaled an electrical contract sum of $1.1M.

After the completion of the Garden Bar, Industrial Electrics have continued to work on over more than five projects and have more scheduled for the future.

Projects Include but Are Not Limited To…

} The Garden Bar
} The Harvest Restaurant
} The Star Grand Swimming Pool
} The Star Tequila Bar



Arcadia College

12 Centreline Pl,
Robina QLD 4226

The Arcadia College Project spanned across 12 month and was an electrical contract sum of $1M. Industrial Electrics collaborated with Alder Constructions on the multi-purpose facility to complete the upgrade for classrooms, specialty learning rooms, IT hubs and other facilities.

Work Completed but Not Limited To…

} Lighting supply and installation
} Power installation
} Testing and Commissioning
} Main distribution switchboards
} Underground Works

Elanora Wastewater Treatment Plant – UGL Infrastructure

Elanora Wastewater Treatment Plant, Elanora, QLD, 4221

The project involves the mechanical and electrical installation of a new Preliminary Treatment Area (PTA) at the Elanora Wastewater Treatment Plant.

The mechanical and civil works are being completed by UGL and Industrial Electrics are completing the electrical aspects.

Electrical Milestones

- The completion of the electrical switch room install
- The completion of the odour control facility
- The completion of the lime dosing facility

The hardest thing about the project is the “moulding” of new plant into the old plant, which is nearly 40 years old. As technology over the years has increased, trying to get the old plant to respond to the new initiative is somewhat of a challenge and has taken a lot of thought and experience from the staff on site.

137 Abbostford Road

137 Abbotsford Rd,
Bowen Hills
QLD 4006

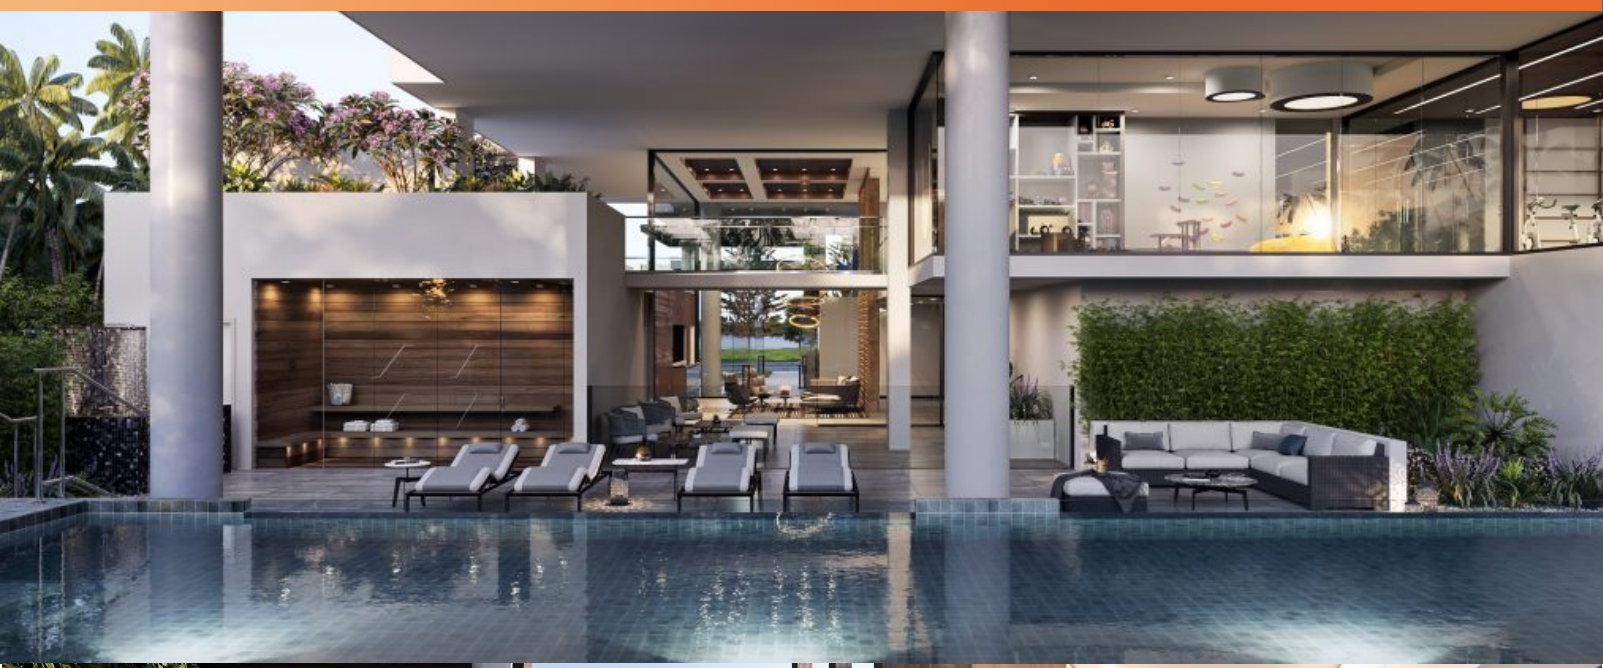
137 Abbostford Road was a job that spanned across a six-month period. This job was completed for APC Logistics, alongside Mettle. The $170 000 electrical contract sum was carried out by our qualified electricians to complete the 2-storey commercial structure.

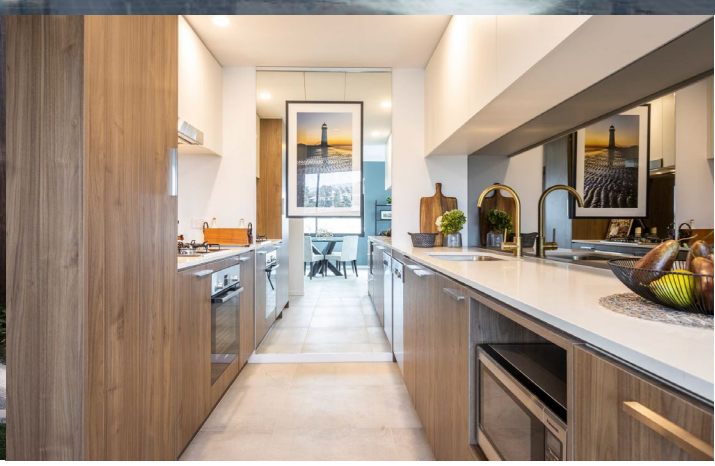
Pimpama Wastewater Treatment Plant - Allconnex

Pimpama Wastewater Treatment Plant, Kerkin Road North, Pimpama, QLD, 4209

The Pimpama Coomera water future master plan aims to create a sustainable water future for the communities of Pimpama and Coomera by taking a head on approach to all aspects of water cycle management.

The master plan creates efficiencies in all aspects of the water cycle by reducing drinking water use, capturing rainfall, managing storm water and maximising recycled water use.





372 – 371 Marine

372 Marine Parade
Labrador QLD 4215

The Three72 project was completed with the Aniko Group, totaling an electrical contract sum of $1.1M. The aim of this project was to complete an elegant design to compliment the beautiful waterfront Labrador location.

Industrial Electrics was able to do so with the contemporary electrical and lighting design. Exterior lighting in the pooling area was completed followed by an extravagant interior to accentuate the luxurious resort dining space.
